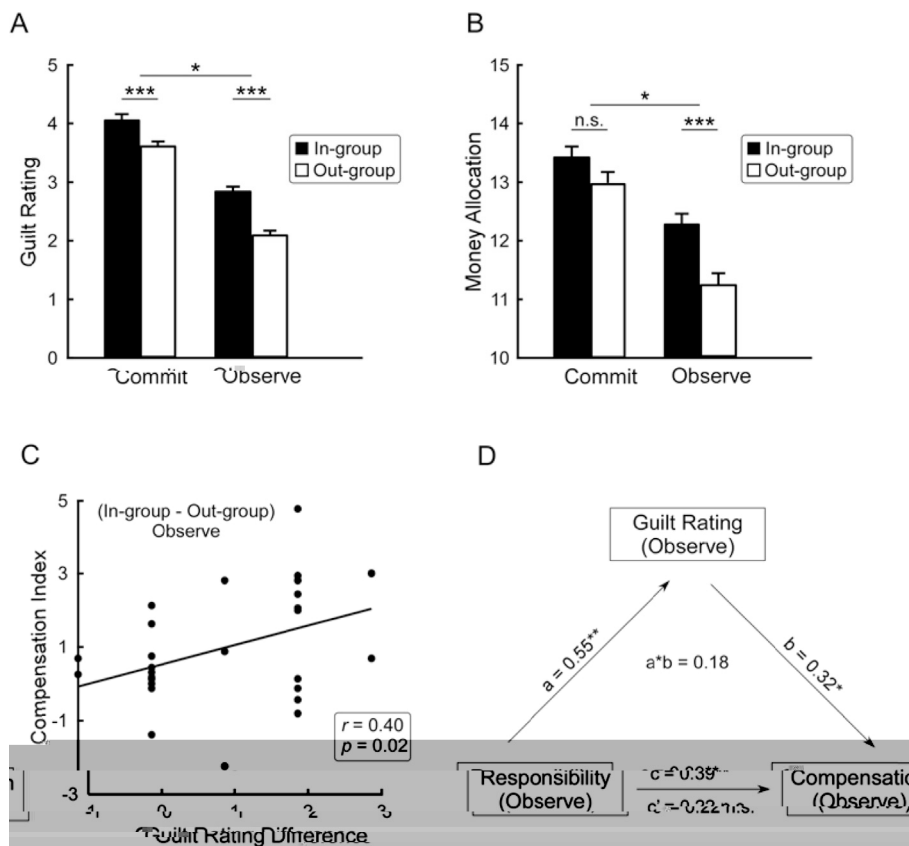

Fig. 3. Behavioral results of Experiment 1 (A) and Experiment 2 (B).

Panel A shows Guilt Rating for Commit and Observe conditions. In-group (black bars) and Out-group (white bars) are compared. Significance markers: \*\*\* for Commit, \* for Observe.

Panel B shows Money Allocation for Commit and Observe conditions. In-group (black bars) and Out-group (white bars) are compared. Significance markers: n.s. for Commit, \*\*\* for Observe.

Panel C shows a scatter plot of Compensation Index vs. Guilt Rating Difference. Data points are categorized by (In-group - Out-group) Observe. A regression line is shown with  $r = 0.40$  and  $p = 0.02$ .

Panel D shows a path diagram with variables: Responsibility (Observe), Guilt Rating (Observe), and Compensation (Observe). Path coefficients:  $a = 0.55^{***}$ ,  $a*b = 0.18$ ,  $b = 0.32^*$ .
